Observed CUDA launches: matching numerical behavior is not an E2E speedup

| Operator | Native short kernel | Dense-compatible fixed kernel | Work limitation |
|---|---|---|---|
| K / V | Native 26: 64x64 sliced | Dense/fixed: 128x64 + split-K | 26 valid; tile M capacity 64 |
| Gate / Up | Native 26: CUTLASS 64x64 | Dense/fixed: CUTLASS 256x128 | 26 valid; same Dense launch grid |
| Down | Native 26: CUTLASS 64x64 | Control retained native | Already exact; no replacement |
