ChooseAttr | QID 09152646 | Is the sailboat to the left of the lighthouse large or small? | Full: Small

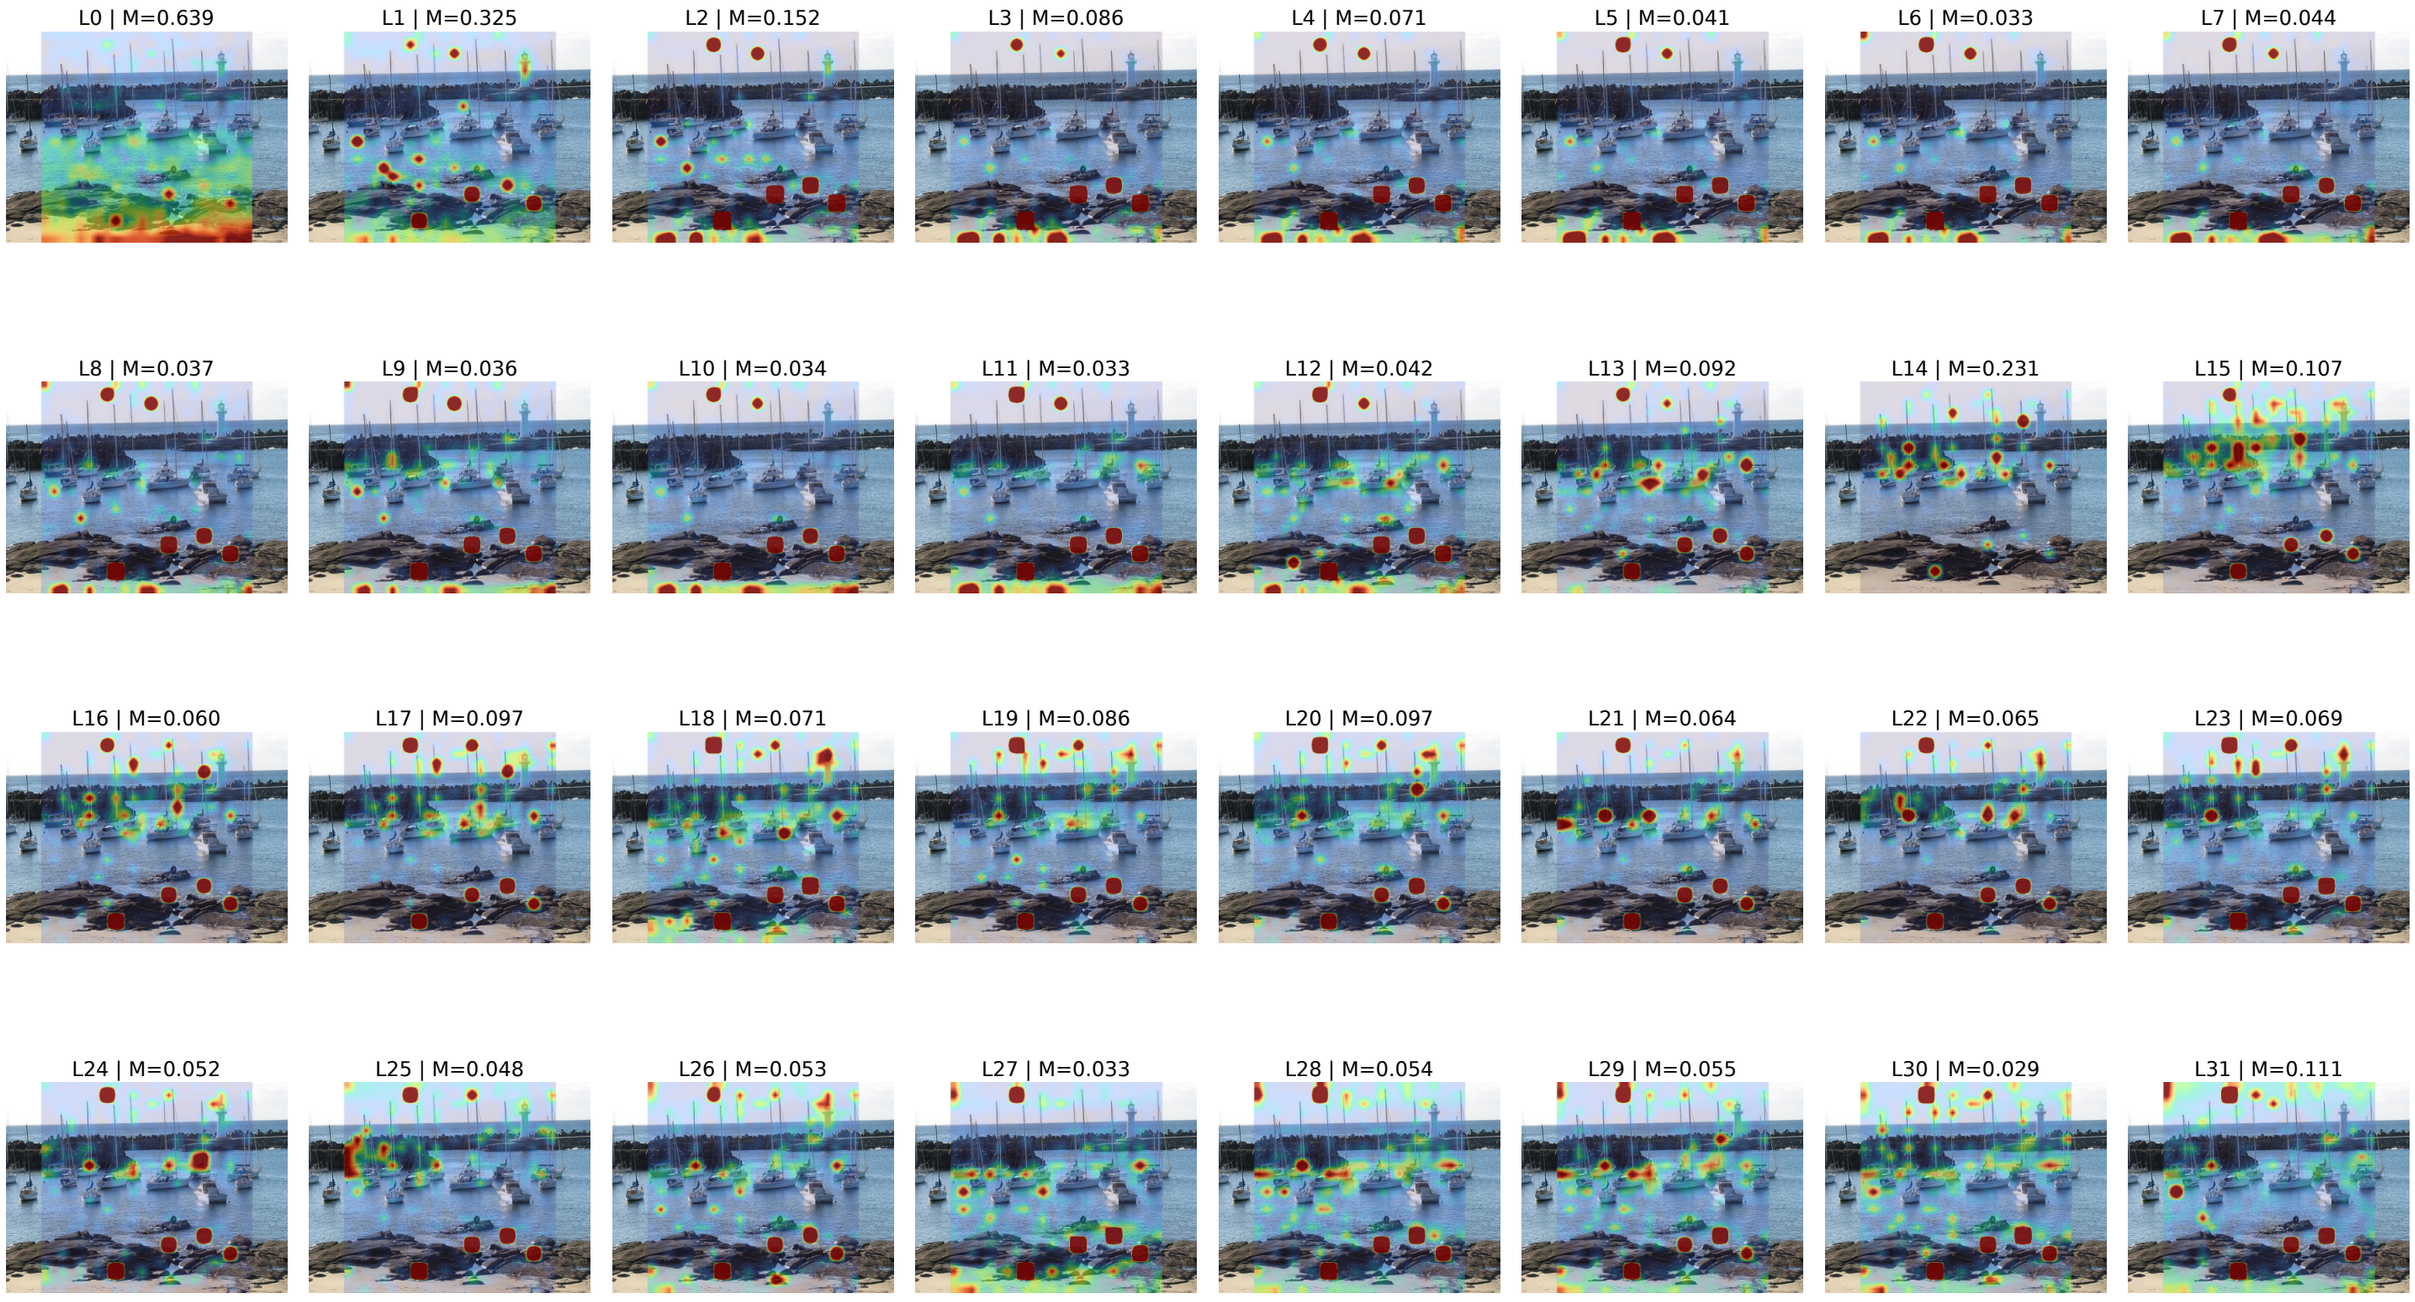

Visual-conditional probability; one logarithmic color scale shared by all 32 layers in this case. M = raw Image mass.

Native head-averaged 24 x 24 maps. No probability values changed; no new inference. Outside the CLIP center crop is unobserved.

ChooseAttr | QID 09152646 | Is the sailboat to the left of the lighthouse large or small? | Full: Small

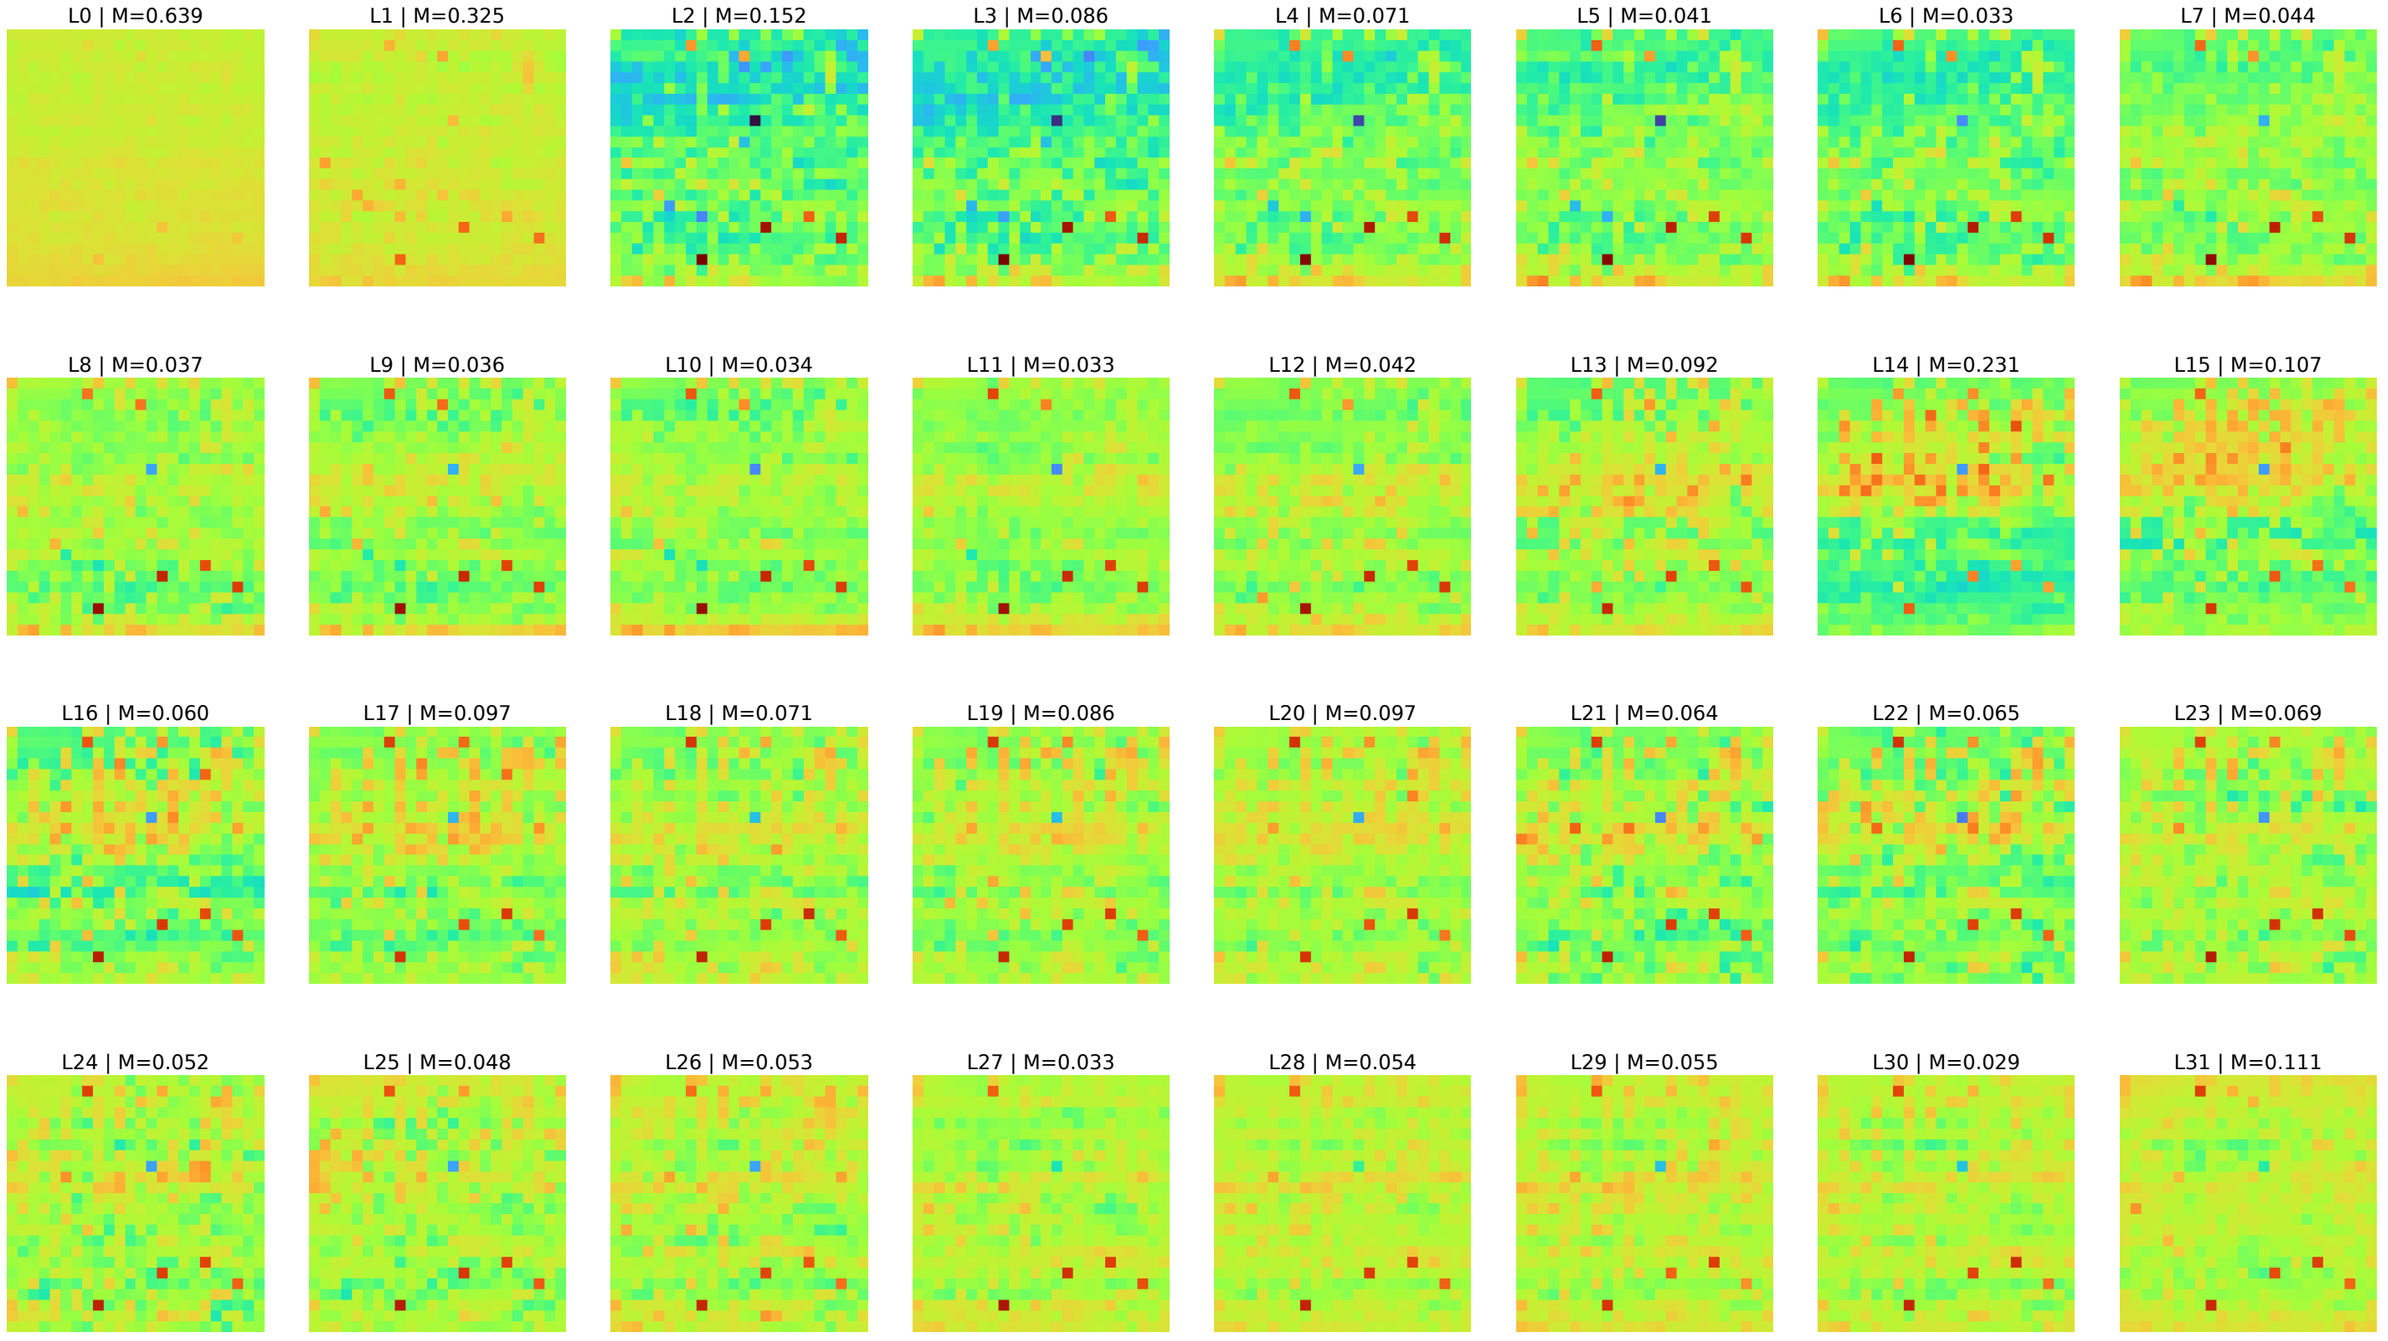

Per-layer 2-98% contrast enhancement: colors show relative within-layer display strength, NOT probability. Do not compare color intensity across layers.

Native head-averaged 24 x 24 maps. No probability values changed; no new inference. Outside the CLIP center crop is unobserved.
