Figure A - Semantic Selected vs Omitted Visual Attention

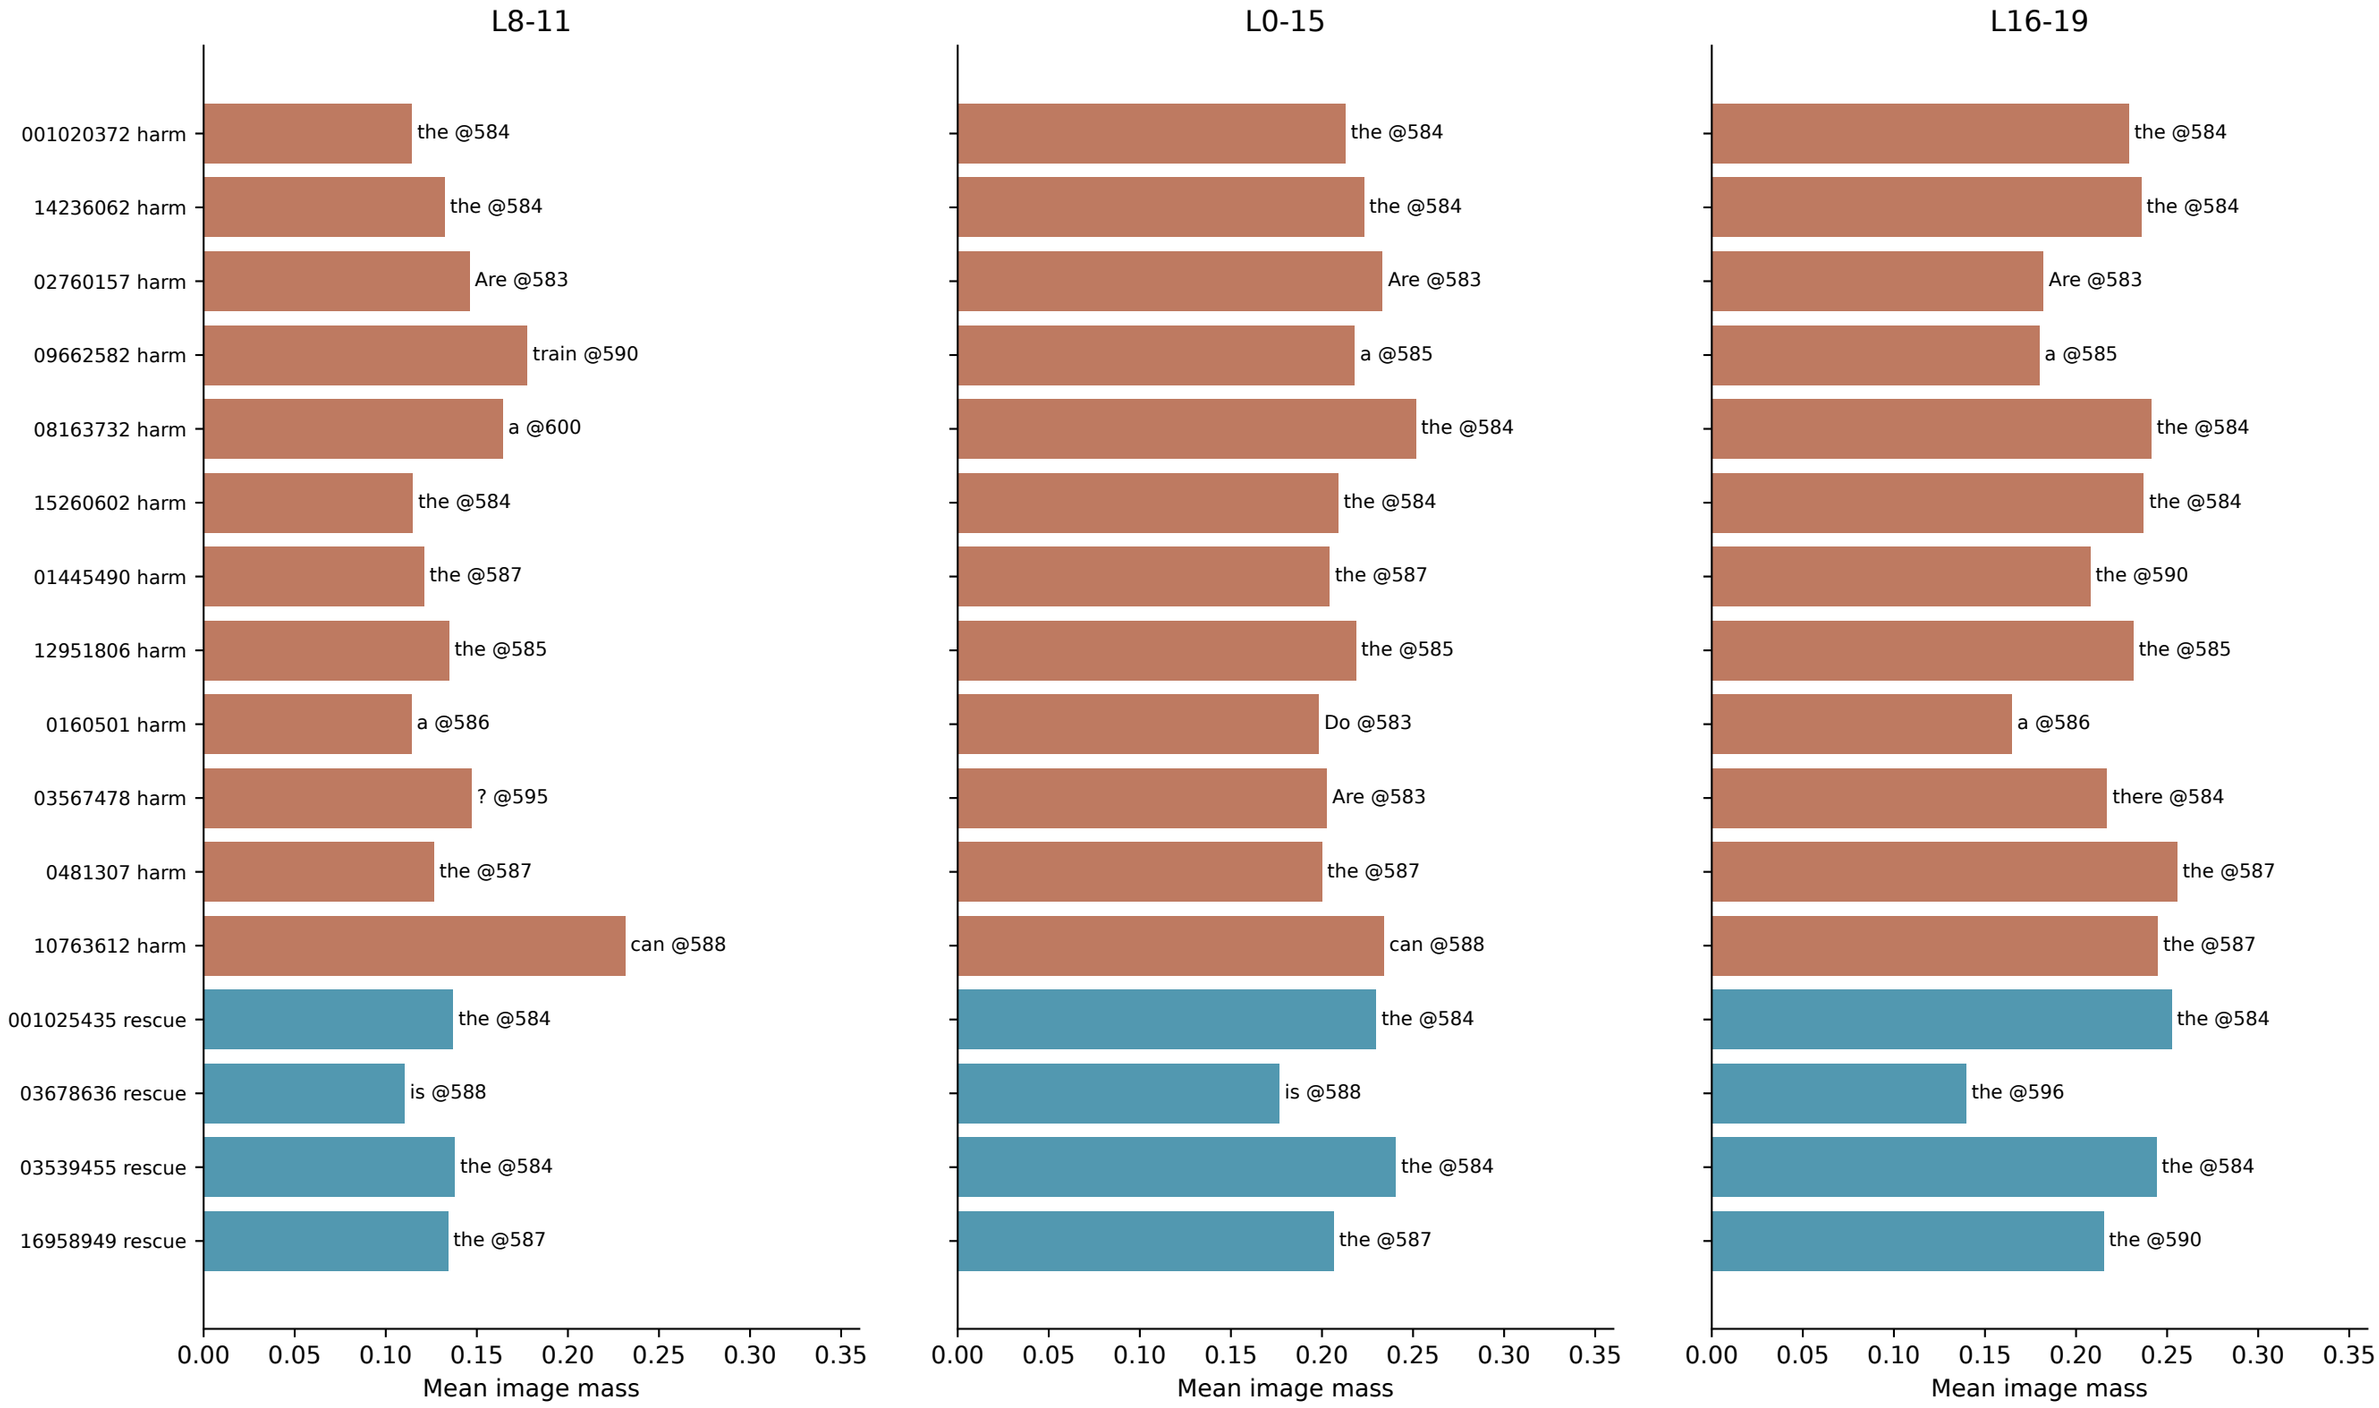

Brown circles:12 harm cases; blue triangles:4 rescue cases. No head/token treated as an independent sample. L31 shown separately.

Figure B -16 Actual Layer x Text-Group Heatmaps

Every panel has its own original text groups; no shared positional token alignment. Full labels appear in the16 individual heatmaps and case cards.

Figure C - Highest-Mass Omitted Question Group in Each Case and Band

Top1 shown for readability; all per-case, per-scope Top5 groups and normalized values are preserved in CSV. These are candidate observations, not causal effects.
